TigerShark™ Fish Fertilizer

Tiger Industries TigerShark Fish Fertilizer is listed by the Organic Materials Review Institute (OMRI), one of the strictest organic review agencies in the country.

TigerShark Fish Fertilizer

TigerShark Fish Fertilizer is an all natural bio-stimulant made from North Atlantic fish with an N-P-K of 2-4-1 and an organic deer and pest repellent.

TigerShark Fish Fertilizer suspends on plants and roots for longer uptake availability than petroleum-based fertilizers.

University studies have shown TigerShark Fish Fertilizer to outperform chemical fertilizers.

TigerShark Fish Fertilizer is organic, non-toxic, and completely safe to humans and the environment. TigerShark Fish Fertilizer will not compromise local water supplies.

Nutrient Analysis

TigerShark Fish Fertilizer is made by a unique cold process that protects the vitamins, amino acids, enzymes, and all the micro and macro nutrients naturally found in fish. Nitrogen and other nutrients are chelated, so they are readily available for plants consumption.

Unlike fish emulsions, TigerShark Fish Fertilizer retains the fish proteins and oils and is easy to apply.

Fish emulsions are boiled down, cooking out 50% of the fish's nutrients. The result is a goopy mess that clogs spray equipment.

Deer and other pest are repelled by the proteins and oils in TigerShark Fish Fertilizer. One application will repel pest for one to three months.

All Tiger Industries products are non-toxic and biodegradable!

Application

Fertilizer: Dilute 2 gallons of TigerShark with 60 to 80 gallons water per acre. For even better results add 2 gallons of TigerCal 30 Liquid Calcium with Humate per acre. Apply with spray equipment or drip systems.

Deer Repellent: Dilute 2 gallons of TigerShark with 30 to 40 gallons water per acre. Spray all plant surfaces for best results.

"We had great crops using your product last year. It kept all the deer, raccoons, groundhogs and rabbits away." – Gary Tripp

For the past three years I have used TigerShark and the results have been remarkable!" – Michael Rielly
